

The daring design evokes Cassandra's myth.

"No one would ever believe her mysterious predictions,
but at the end, she was always true."

similarly,

Cassandra's kitchen space and utility are not fully
comprehended until the real experience.

> Cassandra Cucine is a company that designs and manufactures innovative, exclusive kitchen furniture systems. We are proud to be the world's first creators of curved kitchens in front view, while others' are arched in plan view.

The novelty of the design lies in the additional fact that the entire kitchen, including the hanging cabinets, are freestanding.

The design was perceived and developed by the founder and partner of Cassandra Cucine, Industrial Engineer, Giorgio Pittarokili whose belief and passion is an integrated change in form based in a free spirited attitude towards living.

"Why should people take as a given fact that kitchen must be made of square boxes? Many of us would like to experiment and implement a different way of storing and processing in order to make everyday's life more fascinating and creative".

exclusivity unlike anything else seen before

COLLECTION

Based on different materials that upholster the kitchen's facade, we have created a collection that purely expresses an enhanced emotion matching with an every day, creative utility.

CRYSTALLI

The ultimate Icon of Elegance. The special features of each space are distinctively reflected in the crystal view of the kitchen's facade. The beveled glass that coats each door smoothly rests on the varnished natural veneer of the back side of the doors.

CIBRON\E

The rough look of stucco concrete outside the hull and the countertops, evokes an intense contrast with the brushed and polished copper coating the doors. Copper and concrete: an explosive combination that introduces a new benchmark in contemporary living.

CAPLAMANI

Our passion for exclusivity is leading us to select the finest quality natural veneers from trees found all over the world. However, we have a strict environmental policy to ensure all the necessary certificates for timber harvesting from our suppliers.

CIMARE

Curvy like a sea wave, Cassandra Cucine is in her natural environment. Moving on the sea, this masterpiece furniture assumes the role of a bar rather than the one of a kitchen workspace. Wine fridge, champagne bottle stand and coffee machine are ingeniously nested within the elliptical cabinets.

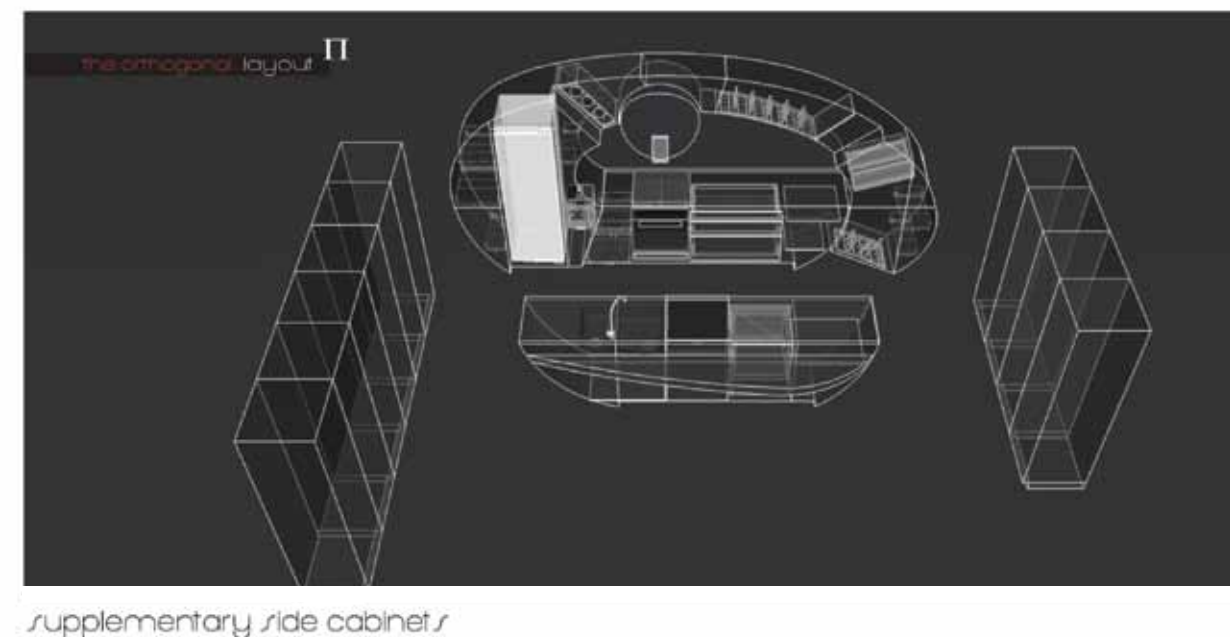

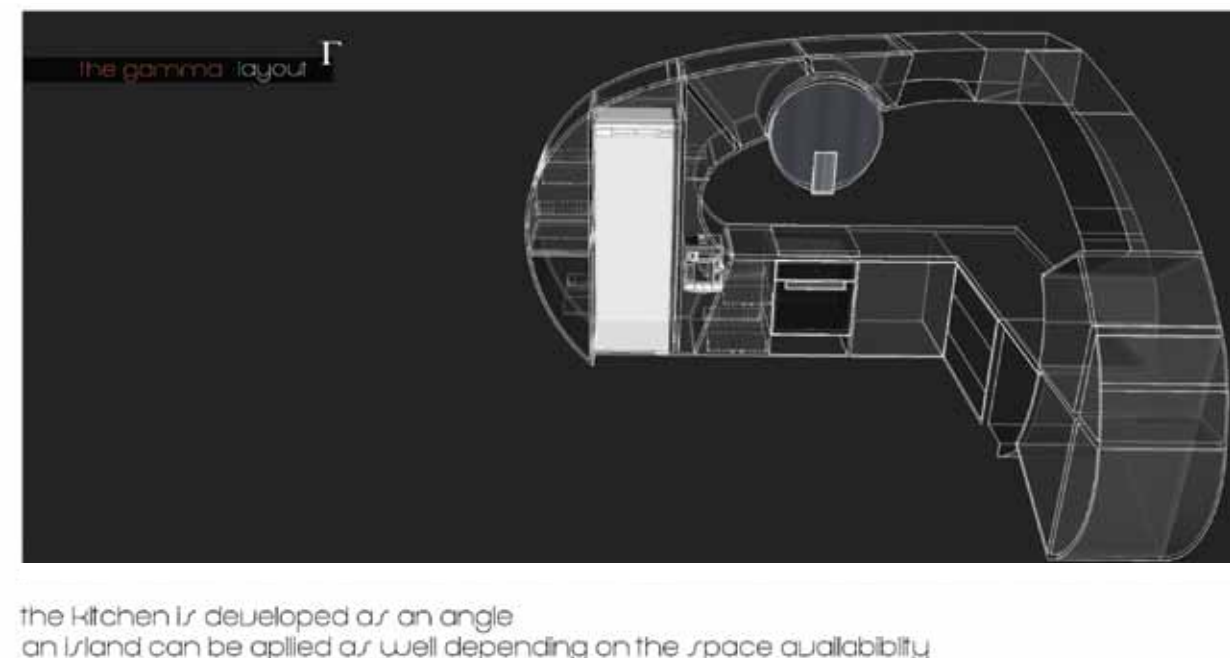

Cassandra Cucine will enhance your desire for creativity

- > The elliptical shape embodies the very soul of Cassandra Cucine.
The hanging cabinets are based on the opposed vertical columns, exactly as it happens with a bridge.
The electrical appliances are ingeniously nested within the elliptical cabinets.

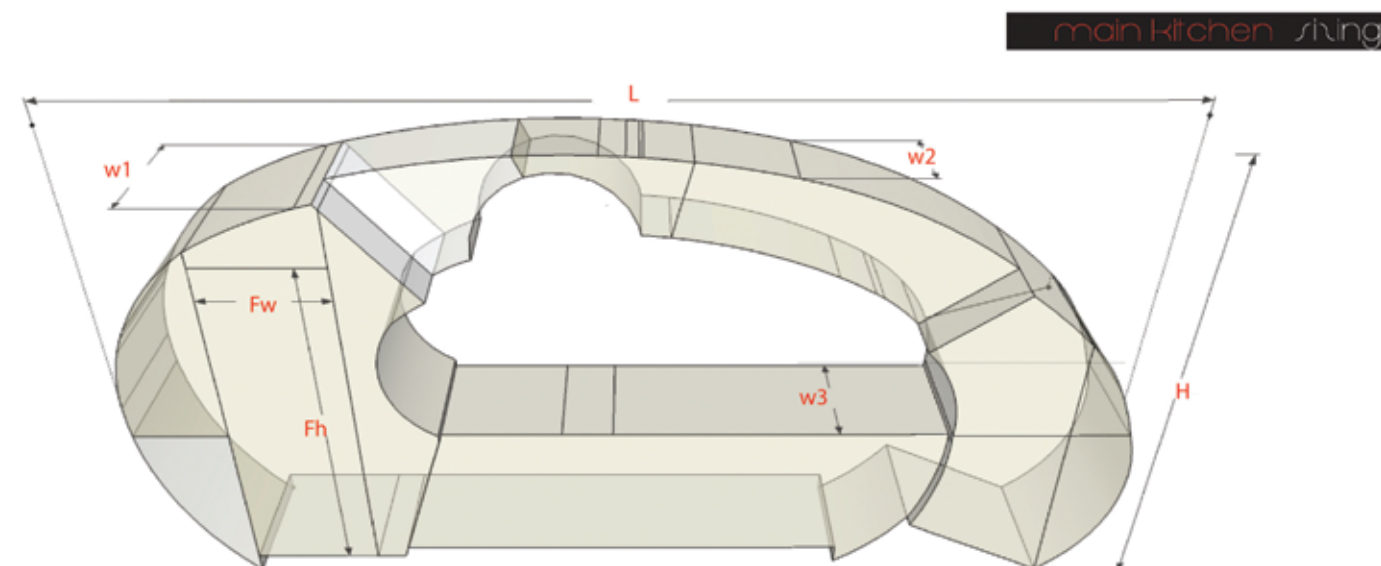

- > The arched shape has been adapted to various kitchen floor plans even to a corner, 'Gamma' (Γ) layout.
The 'Orthogonal' (Π) is, respectively, the layout in which the main structure, with or without the island, is supported with side, square cabinets where additional electrical appliances can be nested.

There are standard, available sizes for the main kitchen, while special sizes can be applied upon request. However, there are some limits to the special sizes as well, in order to geometrically retain the consistency of the curvatures.

STANDARD Sizes (meters)

L	4,00 / 4,50 / 5,00 / 5,50
Fh *	1,77 - 2,05
Fw **	0,55 - 0,61
w1	0,64
w2	0,40
w3	0,58
H	2,35

- * A typical height of a built in fridge freezer is $\pm 1,77m$ or $\pm 2,05m$
- ** A typical width of a built in fridge freezer is respectively, $\pm 0,55m$ or $\pm 0,61m$

SPECIAL Sizes (meters)

L	3,70 - 7,50
Fh	1,77 - 2,05
Fw	0,55 - 0,61
w1	0,64 - 0,94
w2	0,40 - 0,70
w3	0,58 - 0,88
H	2,35 - 2,65

only for
freestanding
installation

- * For a free standing installation all the cabinets can be proportionately wider so as to apply doors from both sides

ELECTRICAL APPLIANCES

Fridge Freezer	1,77 - 2,05
Cooktop	any
Oven	any
Microwave oven	any
Hood (recommended)	ELICA, Space model
Dishwasher	any
Coffee machine	depending on the choice of the other units

island island

There are no restrictions, neither standard sizes for the island. The size depends on individual floorplans.

materials

The entire hull and the doors are made of premium-grade, waterproof plywood while different materials such as natural veneer, glass, brass, stainless steel can be applied on the doors for special finishing.

Moreover, it is of great importance to us to ensure all the legal documents for timber harvesting from our suppliers and the ecological certificates for varnishes and lacquered systems that we apply.

motion systems

The study of the motion of asymmetrical doors is a tough job that requires hundreds of hours on tirelessly testing of different mechanisms and motion systems.

Our in-house engineers, along with our highly skilled craftsmen, have opted for a selection of mechanisms made at the best European factories.

worktops

The choice on worktops is an added part of the tailor made masterpiece. Matching the style with a feeling of touch, industrial or natural materials such as acrylic solid surfaces, granite or marble can be featured on worktops.

> carrara marble

> stucco concrete

Please note that for natural materials the textures may differ from those that appear in the photos.
